MIFARE and Contactless Cards in Application RFID technology has conquered many areas in which barcodes, magnetic strips and contact smartcards were used previously. Everyday applications, such as electronic ticketing, access cards, debit cards and electronic identity documents would not be possible without this technology.

As a general definition, radio frequency identification (RFID) tag technology is used in applications that identify or track objects and contactless smart card technology is used in applications that identify people or store financial or personal information.

MIFARE

The MIFARE® DESFire® family consists of various contactless ICs and are suited for solution developers and system operators building reliable, interoperable and scalable contactless solutions. It targets multi-application smart card solutions in identity, access, loyalty and micro-payment applications as well as in transport schemes.

Smartcards and RFID

Smart Card Magic.NET is a simple development environment for MIFARE-, ISO/IEC 14443-und ISO/IEC 7816 smartcards. Smart Card Magic.Net is a powerful graphic user interface supporting both the Elektor-RFID-Reader and different commercial PC/SC reader devices. The program provides the ability to send individual card commands to different types of contactless smart cards at the click of a mouse.

Radio Frequency Identification - RFID

Java Smartcard I/O API. Since Java Version 1.6, the Smartcard I/O API has been available. This API supports communication with PC / SC readers and smartcards. The following classes are included in the javax.smartcardio package: ATR, CommandAPDU, ResponseAPDU, TerminalFactory, CardTerminals, Card, CardChannel, CardPermission, CardException, CardNotPresentException and TerminalFactorySpi.

Radio-frequency identification (RFID) is an up-and-coming technology. The major limitations of RFID technology are security and privacy concerns. Many methods, including encryption, authentication and hardware techniques, have been presented to overcome security and privacy problems. This paper focuses on authentication protocols. The combination of RFID technology being popular but unsecure ...
